BUILD THE GHOSTBUSTERS™ ECTO-1

GHOSTBUSTERS ECTO-1

THE MODEL

Packed with authentic details inside and out, this 1:8 scale replica of the ECTO-1 is the collector's item that Ghostbusters fans have been waiting for! The model is based on careful study of the original 1959 Cadillac Miller-Meteor ambulance used in the classic 1984 film. It comes together in satisfying monthly installments to create a high-quality display model with an array of working features.

HEADLIGHTS AND PARKING LAMPS

ECTO-1's headlights and parking lamps can be activated by pressing a switch on the dashboard.

SIREN AND EMERGENCY LIGHTS

The five beacon lights, two bars of rotating police lights, and the siren on the roof all work.

FREE-STANDING STRETCHER

The back of the ECTO-1 even contains the gurney, which you can slide out of the rear of the vehicle.

PKE-DETENTION ARRAY

The ECTO-1's spook-detecting roof rack is screen-accurate, and several of the parts are moveable.

EAGLEMOSS PRESENTS BUILD THE

BACK™ TO THE FUTURE THE DELOREAN

TM

1:8
SCALE

DELOREAN TIME MACHINE

THE MODEL

The model is a scale replica of Doc Brown's DeLorean time machine from the Back to the Future trilogy. It is 1:8 scale, and is principally constructed of die-cast metal. All Doc's modifications have been carefully recreated from the nuclear reactor to the cables on the floor, and the model has a wealth of lights. You even have the option to build the versions that appeared in the sequels.

TILTING WHEELS

The wheels can be tilted to create the version of the car that flies in Back to the Future II.

TIME CIRCUITS

The time circuits light up and are pre-set with all the important dates from the first movie.

V6 ENGINE REPLICA

Underneath Doc Brown's nuclear reactor sits a fully detailed replica of an actual DeLorean V6 engine.

GULLWING DOORS

DeLorean has lights on the sides of the gullwing doors and one inside the hood, illuminating the luggage compartment.

ASTON MARTIN DB5

BUILD THE
JAMES BOND'S
DB5⁰⁰⁷

THE MODEL

The model includes all the additional features that were seen in Goldfinger, from the rotating tire slashers to the ejector seat. Also includes concealed machine guns, rotating license plates, bulletproof screen, working horn, retractable overrides, concealed weapons drawer and working lights.

IN THE DRIVER'S SEAT

The dashboard is a scale replica of the real thing: the steering wheel actually turns the wheels and the entire dashboard lights up at the press of a button. The horn works, too.

GEARSTICK

Flip the top of the gearstick to access the hidden button for the working ejector seat. The console for the tracking device lights up and flashes to plot the position of Goldfinger's car.

ROTATING LICENSE PLATES

The car is fitted with rotating back and front license plates that show three different registrations - British, French and Swiss.

TIRE SLASHERS

In Goldfinger, rear tire scythes burst the wheels of Tilly Masterson's Mustang. On your model, the slashers can be extended out and pushed back in.

MUSTANG ELEANOR

THE MODEL

Authentic in every detail, your magnificent 1:8 scale model is an exact replica of the beautiful Eleanor – star of the 2000 movie *Gone in 60 Seconds*. Made from die-cast metal and other high-quality materials, this is the first-ever 1:8 scale build-up model of this screen icon. Features include working lights, open-and-close hood, trunk and doors, turning wheels and much more.

REAR LIGHTS

All the lights on the car work and can be activated by a button on the dashboard.

NITROUS TANK

Pop open the trunk and there's the nitrous oxide tank, just like in the movie. "We saved the best for last..."

AUTHENTIC DETAILS

From the pepper grey paint scheme to the design of the gauges, nothing has been overlooked.

"GO BABY GO" GEARSHIFT

Working replica of the Eleanor's signature gearshift as seen in the movie.
